SH-2500

Direct-Fired Recirculating/Make-up Air Portable Heaters

## The Solution for Any Temperature Control Application!

The Safe-Heat line of portable heaters provides dependable, reliable and efficient operation. The SH-500, SH-1000 and SH-2500 portable heating units deliver between 100,000 - 2,500,000 BTU/h of heating power with a patented combustion system to solve any application you may have. For maximum efficiency, all three of these TOPP models maintain a lower discharge temperature of 100-220 degrees to achieve optimal air mixing and reduce stratification.

## Safe-Heat® Applications

- Construction Sites
- Manufacturing
- Sporting Events/Special Events
- Plant Shutdowns

**TOPP**®  
PORTABLE AIR

## Features and Benefits

### Over-Built Heavy, Cold Rolled Steel Construction

Coated with a two-stage enamel paint process to withstand harsh industrial and construction conditions.

### 100% Stainless Steel Burner

With electronic ignition design and proven air-mixing process to ensure complete combustion.

### Asco Solenoid Valves Ensure Complete Combustion

High-efficiency axial propeller maintains air movement through higher static pressures.

### Totally Enclosed, Air-Over, Fan-Cooled Industrial Motors

Operate on 120V power and are totally grounded, with large diameter wheels and rubber-gripped handles for ease and portability.

### Exclusive Inner-Lined Heat Shield

Maintains cool outer shell around complete diameter to enhance worker safety.

### Get More For Your Heating Dollar!

The cost of energy is a serious concern, and TOPP heaters have earned an outstanding reputation for economy and reliability. Our engineers analyze the location, size and special conditions of your temporary heating application and recommend the most efficient system from our complete line of heating equipment.

#### TOPP Gives You a Choice

You can rely on TOPP as your source for temporary heat with either natural gas or propane depending on your application. And only TOPP will include fuel coordination with a national network of fuel suppliers for low-cost operation.

#### Safety and Approvals

TOPP offers CSA/AGA approved equipment that meets or exceeds OSHA safety and environmental standards. ALL components used in the manufacturing of the Safe-Heat line meet ANSI z.83 standards for construction heaters. We also offer a full line of CSA/AGA approved re-circulating units for natural gas and propane.

Each Safe-Heat model is design certified to ensure safety and efficiency on each jobsite.

Model	BTU/ Hour	CFM	Electrical Requirements	Fuel Type	Max Fuel Usage	Net Weight (lbs.)	Dimensions H x D x W (in.)
<b>SH-500</b>	100,000 - 500,000	4,600	115V, 1 ph 7 amps	LP/NG	5.46 gal. or 5 therms	135	30 x 42 x 20
<b>SH-1000</b>	400,000 - 1,000,000	5,250	115V, 1 ph 13 amps	LP/NG	10.9 gal. or 10 therms	195	33 x 48 x 22
<b>*SH-2500</b>	750,000 - 2,500,000	10,000	208/230V 12.2/11 amps	LP/NG	25 gal. or 25 therms	250	37 x 58 x 29

\*Pending CSA approval

### Experience the TOPP Advantage

At TOPP, customers come first! We are committed to providing the highest quality products at the best possible prices. Our sales staff is dedicated to finding the best solution to your temperature control problem. Each project is individually specified and quoted, guaranteeing you receive personal service. Our sales staff is dedicated to finding the best solutions for your temperature control problems. We are on call 24 hours a day, 7 days a week, making it possible to provide you with service wherever and whenever it is needed.

**Safe-Heat Warranty:** We offer one of the industry's most comprehensive warranties. We warrant all heating equipment to be free from defects in material or workmanship under normal use and service for one (1) year from delivery. The warranty extends only to equipment that is returned to our factory in Aston, Pennsylvania.
