

Rocky Mountain Portable Cooling specializes in the rental of portable cooling, heating, and power generation solutions, and dehumidification equipment. We offer a variety of high-quality portable units to solve any of your needs with service you deserve!

Our unsurpassed high-quality portable Cooling, Heating, Dehumidification, and Generators are:

- Available 24 hours a day, 7 days a week
- Cost effective
- Available for rental and purchase
- Offered for short or long term rentals
- Available in a variety of sizes
- Superior customer service

Companies depend on **SureCool® Rental Systems**

We can engineer, design, and coordinate a system to meet just about any situation you might have!

Whether you need **cooling, heating, dehumidification, or generators**, our **rental** units can solve a variety of needs, including:

- Emergency situations
- Scheduled maintenance
- Equipment replacement

- Special events
- Supplemental
- Catastrophe

We service a broad range of facilities including, but not limited to, electronic, industrial, educational, healthcare, hotels, restaurants, indoor or outdoor tents, data centers and computer rooms.

COOLING UNITS

- Water-cooled
- Air-cooled
- Trailer mounted
- Evaporative
- Chillers
- Fans

We offer a wide variety of cooling units ranging from 1/2 ton to 200 tons, with the ability to partner to 10,000 tons.

POWER GENERATION

Generators ranging from 6 kW through 350 kW, in single or three phase configurations.

HEATING UNITS

Heaters ranging from 30,000 Btu/h through 1,500,000 Btu/h. Units are available in propane/natural gas, oil and electric.

DEHUMIDIFICATION UNITS

- Indoor or outdoor
- Low profile design
- Delivered air moisture level of -55° dew point and lower attainable.

"Providing Portable Cooling, Heating and Power Generation Solutions"™

"See reverse side for equipment details"

COOLING UNITS

At Rocky Mountain Portable Cooling, we strive to provide powerful cooling directly to the area where it is needed. Our SureCool® method can help you determine which system will meet your requirements and provide you with the best possible solution.

Air-cooled

- Our convenient, self-contained Portable Cooling Units that range in size from 1/2 ton to 5 tons and are ideal for a variety of jobs that are tight on space.
- For jobs that require more extensive cooling, we offer SureCool® trailer and skid mounted cooling units that range in size from 5 tons to 60 tons.

Water-cooled

We carry 1 ton to 5 ton self-contained Portable Cooling Units that cool those trouble spots where condenser air ducting is difficult. Instead, the rejected heat is transferred by the water as it leaves the water cooled condenser coil.

Evaporative

Our portable evaporative coolers are available in 1/3 or 1 HP with a variety of choices. They use an easy garden hose hook-up or when that isn't accessible, an optional water supply tank is available.

Chillers

We can provide air-cooled or water-cooled chillers to supplement existing chilled water systems, when emergency outages occur; during scheduled maintenance or when equipment is being replaced. Our chillers range in size from 30 tons to 250 tons with the ability to partner up to 2,000 tons. We also stock a variety of pumps, hoses, fittings and power cable to accommodate any application.

Air Handlers

We stock chilled and hot water air handlers that range in size from 4,000 to 40,000 CFM.

Fans

When additional air-moving is needed, we have a wide selection of heavy duty, high volume, commercial/ industrial fans from 16" to 48" and airflows to 24,000 CFM.

HEATING UNITS

Propane / Natural Gas

Our gas fired heaters are available in propane or natural gas in sizes that range from 80,000 Btu/h to 1,500,000 Btu/h. All heaters set up quickly and are exceptionally quiet during operation. They have a direct spark ignition system, a thermostatic control, and some are ductable.

Oil

We offer indirect fired oil heaters, where the heat exchanger allows for external exhaust of combustion products. The units range in heating capacity from 400,000 Btu/h to 500,000 Btu/h. These heaters have built in fuel tanks, direct spark ignition and are thermostatically controlled.

Electric

For commercial or industrial applications, our selection of portable electric heaters are either:

- Rugged, self contained, Electric Blower heaters ranging from 10 kW to 60 kW (33,000 Btu/h to 205,000 Btu/h) with adjustable thermostats.

or

- Infra-Red Radiant heaters ranging from 6 kW to 13.5 kW (20,500 Btu/h to 46,000 Btu/h) which provide heat in areas where localized heating is needed.

POWER GENERATION

We offer MQ Power WhisperWatt™ series portable generators ranging in size from 6 kW through 200 kW, in single or three phase configurations and voltages from 120vac to 480vac. The soundproof, weather resistant steel housing allows substantially lower operating noise levels and the multiple receptacles offer fast and convenient hookups. We also stock a variety of distribution panels, cabling and miscellaneous electrical connectors to accommodate any application

DEHUMIDIFICATION UNITS

When humidity control application is needed, we recommend either of our:

- Munters® CARGOCAIRE compact, low profile indoor model with process air flow rates of 150-300 scfm, with nominal moisture removal: 9.1 lbs/hr at 75 °F , 50% RH at 300 scfm.

or

- Munters® CARGOCAIRE weather tight modular unit for indoor or outdoor use with process air flow rates of 1125-2250 scfm, with nominal moisture removal: 60 lbs/hr at 75 °F, 50% RH at 2250scfm.
-
